

## TransGas Rates

This additional Customer Dialogue meeting was called to update the members on the progress TransGas has made in finalizing its rates for 2010

At the September meeting TransGas had indicated that there may need to be an inflationary level rate adjustment for 2010 but that there were a couple of revenue and cost items which together had the potential to avoid the need for any 2010 rate adjustment. At this meeting TransGas confirmed that the items have been favourably firmed up and, as a result, TransGas' 2010 Business Plan now calls for no 2010 rate adjustments.

If you have any questions arising from this meeting, or of the TransGas Customer Dialogue Process in general, please contact Vern Gorr at (306) 777-9556.
